

1. Introduction

The "Junior SOC Analyst" module has provided me with a comprehensive introduction to the world of cybersecurity, focusing on the critical role of a Security Operations Center (SOC) analyst. As organizations continue to face increasingly sophisticated cyber threats, the need for skilled professionals to detect, analyze, and respond to security incidents is more pressing than ever. This module has offered a deep dive into the tools, techniques, and workflows used by SOC analysts to safeguard networks, systems, and data from potential breaches. Throughout the course, I have learned to navigate various monitoring systems, identify and investigate security events, and understand the broader landscape of cybersecurity risk management. The module has emphasized both the technical and strategic aspects of the role, making it an invaluable stepping stone for anyone looking to enter the field of cybersecurity.

2. Module Sections

Room progress (16%)

Woop woop! Your answer is correct

Security Operations Analyst (Tier 3) Threat Hunter

- Works on more advanced investigations
- Performs advanced threat hunting and adversary research
- Malware reversing

Answer the questions below

What will be your role as a Junior Security Analyst?

Triage Specialist

✓ Correct Answer

Task 2: Security Operations Center (SOC)

Task 3: A day In the life of a Junior (Associate) Security Analyst

Your streak has increased. You're 5 streaks away from a badge!

Room progress (50%)

The first thing almost every Junior (Associate) Security Analyst does on their shift is to look at the tickets to see if any alerts got generated.

Are you ready to immerse yourself into the role of a Junior Security Analyst for a little bit?

Answer the questions below

Click on the green View Site button in this task to open the Static Site Lab and navigate to the security monitoring tool on the right panel to try to identify the suspicious activity.

View Site

No answer needed

Complete

What was the malicious IP address in the alerts?

221.181.185.159

✓ Correct Answer

Hint

To whom did you escalate the event associated with the malicious IP address?

Submit

After blocking the malicious IP address on the firewall, what message did the malicious actor leave for you?

Operations: Information 1/1

Woop woop! Your answer is correct

Date	Message
April 16th 2024, 05:27:00:347	Successful SSH authentication attempt to port 22 from IP address 221.181.185.159
April 16th 2024, 05:25:28:235	Unauthorized connection attempt detected from IP address 221.181.185.159 to port 22
April 16th 2024, 02:43:22:456	The user John Doe logged in successfully (Event ID 4624)
April 16th 2024, 02:43:20:658	Multiple failed login attempts from John Doe
April 16th 2024, 02:30:20:215	Logon Failure: Specified Account's Password Has Expired (Event ID 535)

5. Conclusion

Reflecting on the "Junior SOC Analyst" module, I feel more confident and equipped with the foundational skills necessary to contribute effectively to a security operations team. The hands-on experience with SIEM (Security Information and Event Management) tools and the analysis of real-world security incidents has sharpened my understanding of how to detect and respond to potential threats. Additionally, learning about incident response procedures, threat intelligence, and vulnerability management has given me a holistic view of the SOC analyst's role within an organization's security framework. The module's focus on critical thinking and problem-solving under pressure has strengthened my ability to assess and mitigate risks proactively.

However, I also recognize that this module is just the beginning. The cybersecurity landscape is dynamic, and continuous learning is necessary to stay ahead of emerging threats and technologies. Moving forward, I plan to deepen my knowledge of advanced topics such as threat hunting, malware analysis, and forensics to better support a SOC's mission. Overall, the experience has solidified my interest in pursuing a career in cybersecurity, and I am excited about the opportunity to grow further in this field.
